Chalk Talk

Ringling the Bell for Scholarships

By Ed Dalton

Education is all about opportunity. The notion that public schools permit all children a quality education drives the quest for educational opportunity. Not only the opportunity to go to school, but the opportunity to learn to read and write, learn life skills, try new classes, learn to work, find a profession, and achieve success as we strive to be the best we can be.

Scholarships help create educational opportunity and serve multiple purposes. They create incentives for students urging them to pursue educational opportunity beyond high school. Scholarships

recognize students for outstanding educational achievement. They create a means to honor and recognize individuals who have been an example and inspiration to us. Sometimes it's just a way to leave something good behind.

The Tooele Education Foundation has been building its family of scholarships for more than five years and now administers several scholarship programs. This is done for families, individuals, trusts, businesses and groups working together with a shared purpose in mind.

TEF will soon provide scholarship guidelines and application materials to high

school scholarship coordinators and school counselors. Students can then apply for the following scholarships. Scholarship winners will be announced in May.

Other important local scholarships include the Barrick Company Scholarship Endowment and the THS Alumni White Buffalo Scholarships.

Students interested in applying for these and other scholarships should contact their school scholarship coordinator or school counselors for application materials. For additional information on forming a scholarship or donating to existing scholarships please contact TEF.
